**NEW DESIGN**

IMPROVED PERFORMANCE

SATISFIED CUSTOMER
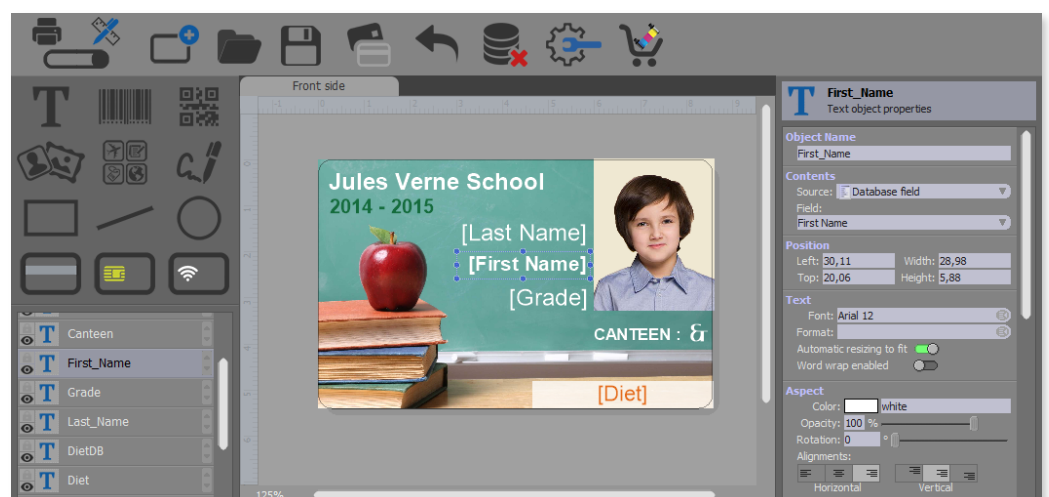

eMedia CS2

Modern and Efficient

At Mediasoft Development, we felt that time had come for a new, refreshed version of eMedia CS. A version that will give customers a real pleasure using it, more friendly and easier to use.

We are proud to present you the new eMedia CS2, with many exciting features to discover.

"Everything looks beautiful, modern and feels a lot more fluid"

"We are confident that this new version will meet our partners and customer expectations"

Compatible with

MATICA TECHNOLOGIES   MAGiCARD   EVOLIS   Datacard   ZEBRA   FARGO Part of HD Global

and many others

Available on

1. Fantastic new design

eMedia has been completely redesigned. It has a whole new interface with integrated and fixed windows for a better and very pleasant workspace.

Every icons have also been renewed for a more modern look of the software.

2. Enhanced performance

Many improvements in the software conception make it more powerful and more reactive during your template design.

3. Objects movement

A more fluid and optimised object movement has come to eMedia. You have now a shadow that you can customise when you move your object. Keyboard arrows now allow you to move objects.

4. Selective printing

You can now select multiple lines and ranges that you want to print. Just as easy as a mouse click!

5. Buy consumables directly from eMedia CS2

A new awesome button has appeared in eMedia, redirecting you automatically towards the website of the matching reseller.

6. New software activation system

You still need a license key to install the software on one computer, but you can now migrate it: uninstall the license from one computer to register it onto another one.

7. Visual template preview

Each and every templates already opened and saved can now be previewed with core informations (name, path, last used date, database...).
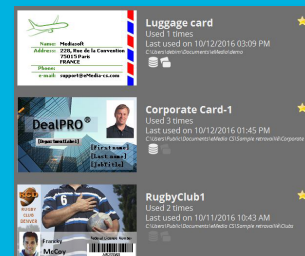

Design, create, print
As simple as it sounds

Adding objects on your template has never been so easy

You can buy consumables directly from eMedia

Preview your last used templates

Present in many countries around the world, we have acquired a large experience by exchanging with partners and customers, listening and taking every remarks into account.

This new version is a huge step towards the **ultimate card design software**.
